WASHINGTONVILLE LOCAL GLEANINGS

By Peter M. Herold

Tell me not in box-car numbers
What my gas bill is to-day,
And my shop rent never stumbers,
While I am away.
Lives of great men all remind us
That we must be the same,
For our time is so so limited,
That we are not the ones to blame.
Let us then be up and doing,
Everyday that we can,
Do before you all are bankrupt,
Is the rule of many a man.
—With apologies to Thos. Hood.

If we can't have coal mines nor a pottery, why not try a brick plant? The Carrollton brick works (a comparatively small affair) shipped 9,200 bricks during the year 1912. The average output being about 30,000 per day. Some were shipped to Montreal, Canada, and one shipment of 1,000,000 to Detroit. The matter of good roads and better buildings will demand more brick plants.

The old Peach water mill at Sherodville became undermined by recent floods and fell into Connoton creek last week Thursday night. The large structure is older than the oldest living person in that vicinity and is nearly 100 years older than the village of Sherodville. When a lad in bare feet I fished along this creek and ate my lunch in the old mill, before Sherodville was on the map.

The Lutheran church was crowded with an appreciative audience of men and women Sunday night to hear an address from the Anti-saloon point of view. The regular choir was reinforced by the Methodist choir, who joined in singing two good hymns and other music. Rev. John A. Wright of Columbus, who was announced to address the meeting, finding that he could not be here, sent Rev. W. L. Eldridge of Cincinnati, who preached in Franklin Square in the forenoon in Hart's church in the afternoon and here at night. He said he had filled the Presbyterian pulpit in Leetonia about 14 years ago, and was to some extent acquainted with the people whom he had addressed that day. He is a dynamic speaker, using frequent gestures and is a rather good talker. The usual cards and pencils were distributed through the audience and then collected when filled. He dumped the collection into his satchel and hastened to get a Y. M. C. A. card at Columbus at the present time. But not without a kick.

There is talk of Grafton furnace at Leetonia being started as a steel plant, after several years' idleness. An iron furnace because the iron ore had to be bought from the trust.
